Mońki, Celestynów, Warszawa Wawer;
- Changes of 79 stations info.

Module Own/agreement tariff (2.59.00)

There were made the following improvements in the part of entering own tariffs (Rates tables):

- It is possible to define minimal weight when calculate the freightage
- Extended possibility of definition NHM codes for which the own tariff is valid or not. Now it is possible to accept "Valid for any NHM with exceptions". At the same time was enabled to enter NHM codes by interval e.g. "8601-8606";
- The item "Complete train" was added to the parameter "Kind of rate". In this case it is necessity to set the weight of complete train in the item "Goods weight";

In the part of price calculation (Calculations), the filtr for own tariff selection was extended by "Railway from" and "Railway to" columns. Together with this, it is possible to enter any text in the column filtr NHM, not only to select from pre-defined values saved in the combo box.

OPTIM (2.63.00)

In the OPTIM module there were implemented following changes:

- The test of required values was added to the items "Goods" and "Container size" in the entering form in the case of setting container consignment. Provided that it was entered other goods than NHM codes 9931- 9949 and simultaneously the item "Container size" contains value "No container" or whereas, then it is displayed warning message about entering incorrect parameters of consignment.
- Button "Map" was added on the first tab in result form for showing founded transportation route in the RailMap module.

RWIS / Railway infrastructure (2.79.03)

There were made actualization of pricing for usage of rail transport path on PLK (Poland) by 1st January 2009.

RailMap (2.67.01)

There were implemented changes in station list RailMap based on the changes in International distance tables for single countries.

Instruction for modules updating in the ERIC program

- Insert ERIC Desktop DVD of the version 05/2009 into DVD drive.
- Start the ERIC Desktop program (if you already run the program, you must quit it and start it again to release all modules from memory. Then you can follow next steps).
- Select the menu item Services / Modules update.
- In a dialogue box set path to directory „Modules“ on that DVD. This can be done by means of „Drive“ combo box, which contains a list of drivers that are connected to your PC.
- By pressing the „Select“ button, run the modules updating and follow the updating procedure instructions.
- In order to verify whether the update was done correctly you can compare the numbers of modules versions (in the „Help / About modules / About program“ menu item) with the version numbers in this bulletin.

In case that you have received a new module into your license, you should do the standard update twice. Otherwise the new module will not work. (During the first update, the data in license will be changed and during the second update the corresponding module will be copied to your PC according to the mentioned license).

CAUTION!

If you'll see window „Open“ during usage program ERIC desktop and then following notification „OLE error code...“ click the <Cancel> button.

To solve this problem please install package „ERIC_UPDATE_04_2009.exe“ that you'll find on DVD ERIC Desktop 05/2009 in directory \INSTALL. In net versions it's necessary to apply this procedure for every station where application ERIC Desktop is installed.

Complete reinstall of application is not required.

Program displays this notification because of system adjustments of function "automatic loading of exchange lists" and in your operation system required libraries weren't found.
