

Dear business partners.
We wish you leisurely yuletide and successful
New Year 2010!

JERID spol. s r. o.

DVD medium and printed bulletin for users of ERIC Desktop program

This is the last printed version of bulletin!

From 1 January 2010 all updates of the program will only be possible over the Internet.

Bulletin for users of ERIC Desktop program will be sent to the contact persons by email.

.....
• **The second planned change is to replace the Consignment notes modules in the ERIC program with a separate application called "Documents+". The aim of this change is to make it more comfortable for the users to work with their documents. The current programming environment of ERIC does not allow us to head the development of these modules in the needed direction. The current Consignment notes modules will be preserved in the ERIC program as they are. From January 1, 2010, however, no development will be carried out and no updates will be issued in connection with these modules.**
• **For current users of the Consignments notes modules in the ERIC program we will be offering special conditions for the transition to the new application "Documents+".**
• **More detailed information about the new product "Documents+" is available on our official web site www.jerid.eu.**
.....

Consignments notes

Update of auxiliary lists (NHM Goods nomenclature list, stations lists) was implemented in modules Consignment notes for filling up some of documents items.

Changes were made in the following consignments notes: CD CN, HZ CN, MAV CN, OBB CN, PKP CN, ZS CN, ZSSK CN, CIM/CUV CN, CIM/UTI CN, CIM/SMGS CN, SMGS/PKP CN.

Instructions for modules update in the ERIC program

- Insert ERIC Desktop DVD of the 13/2009 version into the DVD drive.
- Start the ERIC Desktop program (if you are already running the program, you must quit it and start it again to release all modules from memory. Once you are done, follow the steps below).
- In Services menu selected Modules update items.
- In a dialogue box set path to directory „Modules“ on that DVD. This can be done by means of „Drive“ combo box, which contains a list of drivers that are connected to your PC.
- By pressing the „Select“ button, run the modules update and follow the update procedure instructions.
- To verify whether the update was done correctly you can compare the numbers of the modules versions (in the „Help / About modules / About program“ menu item) with the version numbers in this bulletin.

If you have received a new module into your license, you should do the standard update twice. Otherwise the new module will not work. (During the first update, data in the license will be updated and during the second update the corresponding module will be copied to your PC according to the updated license information).
